
WHAT IS KALA SARPA DOSHA?

There are many yogas that come in Astrology and they are very important. Yoga means union. It is the union of planets. There is also what is called “drishti”. When one planet is facing another planet, it is called “drishti”. It means the two planets are facing each other. While some yogas of planets are beneficial, while there are others that are not so good.

When the 7 planets are in between Rahu and Ketu in the astrological chart, it is called Kala Sarpa yogam or Kala Sarpa dosham. This Kala Sarpa dosham comes for human beings, as well as countries and the whole world. Right now, the whole world is going through a period of Kala Sarpa Dosham. It is a very frightful period. On a personal level, some people might lose their jobs, and sometimes in countries and the world, a lot of negative and challenging consequences can take place. Not only is there a loss of wealth but also moral and ethical people, who live in integrity, also can suffer from desperate situations and difficulties. Sometimes even when some people are going through Kala Sarpa dosha, if some of the planets are in good positions like Budhaditya yogam, Chandra Mangala yogam, Lakshmi yogam and Gajakesari yogam, 50% of the bad effects will be reduced.

Many astrologists researched and addressed the question if the Kala Sarpa Dosha actually gives bad effects or not. They examined thousands of horoscopes and came to the conclusion that Kala Sarpa dosha indeed gives bad effects.

In Bharat (India), some important and best astrologers examine the birth chart themselves and take time to predict. They lead a very sacred and sanctified life and worship Sri Gayatri Devi in full faith and hold on to her feet and trust her wholeheartedly. They make calculations very carefully and speak words that She inspires them to speak. This is the original and authentic prediction. There are no mistakes made.

In this modern-day in kali yuga, people are looking at computer programs to predict but something else is actually happening. People are easily becoming astrologers in this way. However, in true astrology, one has to be disciplined in practicing religious vows and worship and be connected to Sri Gayatri Devi in their hearts. What they say should not be taken lightly. It involves the life of an individual and is priceless. The bharatiya rishis have offered many books on this subject.

Some of the books written are

-Jataka phala Naarayaneeyam

-Datta Nadi Shastram

“Shanthi” Ratna Shastram

These are some of the very old manuscripts, knowledge of which many of the Bharatiya astrologers have. They never consider this knowledge for purpose of a business. They sincerely advise them on how to overcome their difficulties with the intention of protecting them and guiding them according to the indications given by Sri Gayatri Devi’s orders.

At Manidweepa Maha Samsthanam, we have five important and learned astrological advisors. They are aged people and prefer to live in solitude. No matter how materially deficient they may be in their lives, they practice astrology very sincerely and honestly. We are talking about some of the important matters that they conveyed to us.

All about Kala Sarpa Dosham

When Rahu meets and mingles with Guru then it is referred as “Guru Chandala Yogam”.

When Rahu meets the moon in the triangular corners and papa grahas are also present, then it is called “pishacha yogam”. In this kind of situation, people cause a lot of pain and suffering to people in front of them and also kill many animals and wish death on other people. Because of this yogam a person can become a demon in the form of a human and be sadistic.

When there are no planets on both sides of the moon in dvitiya and tritiya house, then it is called “Kemudra yogam”. In such a situation they spoil the works of other people. Our friends become our own enemies and they will not have any respect.

When Shani and Moon get together then it is called “visha yogam”. In this period there will be many attempts at poisoning and a lot of difficulties will arise.

Ultimately other planets are entangled between Rahu and Ketu. Rahu is called time and ketu is called the serpent. This phenomenon is called the Kala Sarpa yogam according to the ancient scriptures. That this period gives 90% of deaths is definitely the truth.

Vedic Pundits have tremendous knowledge in Vedic Mathematics, Algebra, Coordinate Geometry, Trigonometry, Calculus, Numerical analysis, real analysis and many such topics.

These Vedic Pundits with such high knowledge have performed many thousands and lakhs of Gayatri japam who have been firmly established in religious austerities and devotion and dedicated to truth, have led the best dharmic life with great values. They are seasoned in knowledge through their experience in age as well. They received accolades from the Maha Pundits. Receiving the astrological readings from such notable scholars is highly valuable. Today in India there must be at least 50 astrologers in each street who do an electronic analysis and reading. There is a huge difference in that kind of reading and the organic reading of the highly respected and valued astrologers who use the ancient system born out of intuition and wisdom.
